OFFERING #2

SEEDLINGS IN COMMUNITY AND INDIVIDUAL POTS

Explanation of Policy - Please read carefully.

PARENTAGE FORMS. Parentage forms will be furnished without charge with the purchase of any of our hybrid seedlings. These forms give the complete ancestry of the hybrid, and provides the customer with a convenient reference to the parentage of Rivermont Hybrids.

SEEDLINGS IN COMMUNITY POTS. Our hybrid seedlings are planted in communities of approximately 5 to 15 plants per pot. The plants are approximately two years old from seed and are in need of transplanting within three months. The price shown on the offering is the price per plant. Since they are in communities we cannot accept an order for less than 10 plants of any one cross. We can only approximate your order since it is not always possible to find a pot containing exactly the same number of plants you may request.

SEEDLINGS IN INDIVIDUAL POTS. These seedlings are in individual pots and they may be purchased in any quantities unless purchase limitations are specified.

SUBSTITUTIONS. We would like to have our customers give us a second choice to be sent in the event we are sold out of plants of their first choice. No substitutions of a different cross are made unless authorized.

BACK ORDERS. In the event that we are permanently sold out of a cross when your order is received you will be advised. If a second choice is specified, it will be shipped. If we are temporarily sold out of a cross you request, your order will be back ordered and the plants shipped when they are ready.

PAYMENT. Please DO NOT include payment with your order. Payment should be made upon receipt of our invoice or upon acknowledgment of your order. Prices shown are in U.S. dollars F.O.B. Chattanooga.

SHIPMENTS. U. S. shipments will be made by Railway Express unless otherwise requested. All foreign shipments will be sent by Air Mail or Air Express depending on weight, unless otherwise requested.

FIBRE POTS. For the benefit of our foreign customers we are prepared to ship your plants in fibre pots without any extra charge. This will result in saving of from \$0.25 to \$0.50 per pot on mail or express charges. The plants should be repotted into clay pots within about 2 or 3 weeks. Plants will be shipped in clay pots unless otherwise requested.

SEEDLINGS IN SINGLE POTS

Cattleyas and Laeliocattleyas

<u>CROSS NUMBER</u>		<u>LEAF LENGTH</u>	<u>POT SIZE</u>	<u>PRICE PER PLANT</u>
X-100	LC. JANE DANE, alba x C. GIGAS, F.M.B.	4½"-5½"	3" 2½"	6.00 4.50
	This summer flowering white with colored throat gained high popularity when offered previously. The parentage of Lc. Jane Dane is Lc. Britannia, alba x Lc. President Wilson, alba.			
R-435	C. MINNEHAHA, F.C.C. x C. RITA SLADDEN	4½"-5½"	3" 2½"	7.50 6.00
	Fine fall pure whites are expected from this cross. The F.C.C. variety of C. Minnehaha blooms in December, being a cross of C. Lady Rowena and C. Trianae, alba. Its flowers have broad sepals and petals. The lip is ruffled. C. Rita Sladden, (C. Mme. Leten x C. Snowdon) is a fall flowering pure white of good reputation.			
R-437	C. CLEMENTINE GOLDFARB x C. RITA SLADDEN	4½" - 5½"	3"	7.50
	This pure white is a companion cross to R-435 above. The same C. Rita Sladden was used for each, but this cross is expected to flower in late summer and early fall, since C. Clementine Goldfarb (C. Cybele, alba x C. Snowdon) is much earlier than C. Minnehaha.			
X-101	C. HARDYANA, alba x LC. JANE DANE	3½" - 4½"	2½"	6.00
	Lc. Jane Dane is a fine fall white with colored lip. Crossed with C. Hardyana, alba, its seedlings will make fine summer whites with colored lip.			
R-584	BLC. MONORA x C. MOSSIAE		1 3/4"	2.25
	Ble. Monora (C. Trianae, var. Grand Monarch x Ble. Eudora) Ble. Monora flowers in January. Its appearance is not that of a Brasso; but that of a large well shaped intensely colored Cattleya. These seedlings will provide good lavender blooms during February and March.			
R-585	C. MOSSIAE WAGNERI x C. MINNEHAHA, F.C.C.		1 3/4"	2.50
	The albino type of C. Mossiae known as C. Mossiae Wagneri is a late type of C. Mossiae, blooming in May or June. The C. Minnehaha parent blooms in December. This mating combines two parents of fine form to give pure whites in late winter and early spring.			
R-601	C. MOSSIAE x C. TRIANAE, Grand Monarch		1 3/4"	2.00
	C. Trianae, Grand Monarch has large dark flowers with a dark labellum. A good type of C. Mossiae was employed in re-making this cross, C. Trimos, which gives lavender flowers on vigorous plants during February and March.			

R-608 C. EUCHARIS x C. DECEMBER SNOW 1 3/4" 2.25

C. Eucharis, (C. Cowaniae x C. Mossiae Wagneri) is a May flowering pure white with heavy petals and sepals. The lip is white with yellow center. C. December Snow, (C. Edithiae x C. Trianae, alba) is December flowering with large petals and sepals. The lip is white with a yellow center. The flowering of this pure white will peak in February.

R-617 C. ESTELLE, alba x C. MINNEHAHA, F.C.C. 1 3/4" 2.50

This is a companion cross to R-585 and is expected to yield flowers of the same quality and season. The May flowering C. Estelle employed is C. Cowaniae x C. Edithiae. To provide fine pure whites in late winter. A most vigorous grower.

CYMBIDIUMS

		<u>POT SIZE</u>	<u>PRICE</u>
R-15	CYM. RALPH SANDER x CYM. CAPRICE	4 1/2" - 5"	12.00

Unflowered seedlings to bloom in one or two years. A few have flowered with fine form and red and orange-red casts. These plants are newly repotted and established. They are not of a size which would be indicated by pot size.

R-445	CYM. SUNRISE x CYM. CERES, F. J. Hanbury, F.C.C.	3 1/2"	9.00
-------	--	--------	------

These plants have two or more seedling bulbs. Leaf growth is heavy and the plants are fine. This cross is expected to be dark and colorful.

SEEDLINGS IN COMMUNITY POTS

		<u>PRICE PER PLANT</u>
R-644	C. KILNASTIANA SANDERAE x C. NUTLEY, alba	1.50

Spring blooming white with colored lip.

C. Kilnastiana (C. Dowiana x C. Luddemanniana). A summer blooming plant having flowers of medium heavy substance. Petals and sepals are cream white with a ruffled edged crimson lip and large golden eyes.

C. Nutley, alba (C. Harold x C. Hardyana), one of the better known spring blooming whites with colored lip.

R-657	C. DIONYSIUS, alba x LC. HASSALLII, alba	1.50
-------	--	------

Free flowering summer blooming white with colored lip.

C. Dionysius, alba (C. Fabia x C. gigas, F.M.B.) An August blooming plant having large well shaped blooms of good form and texture. This plant produced 25 flowers over the last 5 year period and had 5 flowers on one spike during one year.

Lc. Hassallii (Lc. Britannia x C. gigas). An August blooming plant having large blooms of good form and heavy texture. The petals and sepals are pure white with long white lip having a deep purple tip. This is also a free flowering plant known to have 4 flowers on one spike.

R-675 C. SNOWSONG, var. Rivermont x C. CELIA, var. Rivermont 1.25

A good free flowering white of exceptional texture blooming in the fall.

C. Snowsong (C. Loddigesii x C. Snowdon). A free flowering small white of waxy texture and very good form. Pure white petals, sepals and ruffled lip with a golden throat, known to have 5 flowers with 5½" spread on one spike.

C. Celia (C. Harrisoniana x C. Lady Veitch), pure white with a canary yellow throat. This flower has exquisite form. The petals are so broad they are almost round.

R-676 LC. DERRYNANE x LC. H. G. ALEXANDER, F.C.C. 2.50

A superior lavender hybrid blooming in the fall.

Lc. Derrynane (Lc. Balkis x Lc. Princess Margaret). A strong growing plant producing large dark lavender flowers of very good form and heavy texture.

H. G. Alexander (Lc. Malock x Lc. Momus) This plant received a First Class Certificate at the Royal Horticultural Society for the quality of its flowers. Lovely lavender petals with small splash on tip. Large rose lip with yellow eyes.

R-679 BLC. XANTHEDO x LC. LUMINOSA 1.50

We expect a very good yellow that will bloom in the late fall. This cross will be particularly desirable for commercial growers. It should bloom later than most yellows and furnish flowers for Halloween when yellows are scarce with some spreading into the month of December.

Blc. Xanthedo (Blc. Xanthea x Lc. Mrs. Medo). The blooms have heavy textured orange petals and sepals with a rose lip.

Lc. luminosa (C. Dowiana x L. tenebrosa) A hardy, good growing plant producing very large blooms. The flowers on this plant were of large size, good form, and heavy texture. The petals and sepals were reddish bronze while the lip was of a deep reddish purple. The blooming record on this plant shows 2 good 12/43 - 3 good 10/44 - 3 good 11/45 - 2 good 1/47 - 4 good 12/47.

R-680 LC. DERNA x LC. LUMINOSA 2.00

One of the best yellow hybrids blooming in the fall.

Lc. Derna (C. Dowiana, aurea x Lc. Nugget). This is one of our best known yellow hybrids. The blooms are of large size, good form and heavy texture. Petals and sepals are yellow. The lip is spade type with a ruffled edge and colored a deep rose.

Lc. luminosa (Same as parent of R-679)

R-682 C. CHARYBDIS x BC. BRITISH QUEEN 2.00

We expect a traditionally English lavender hybrid here to bloom in the fall.

C. Charybdis (C. Dinah x C. Chelsea)

Bc. British Queen (Bc. Digbyano-Mendelii x C. Lord Rothschild)

- R-697 L. PURPURATA, alba x L. PURPURATA, alba 2.50
- This is a cross between two white with colored lip L. purpuratas. One plant blooms late in May and the other in early June. Each parent has white petals and sepals and the lip is deep purple. L. purpurata, alba is the only species capable of producing white spring flowers with an intensely colored lip, Lc. Canhamiana, alba (L. purpurata x C. Mossiae, Reineckiana) being the best known example. Very large and fast growing seedlings. This is a rare and unusual buy.
- R-704 LC. LUMINOSA, aurea x LC. LUMINOSA, aurea 1.25
- Lc. luminosa is a cross between L. tenebrosa and C. Dowiana, aurea. Both parents are lovely and unusual. Petals are yellow with lips of deepest purple. Flowering should extend throughout the winter.
- R-706 C. PETALENA, alba x BLC. NANETTE, alba 1.50
- A fine white with colored lip to bloom in the fall. C. Petalena (C. Enid x C. Petersii). Heavy pure white petals and sepals, white lip with a rose tip and yellow eyes. Blc. Nanette (Blc. Everest x C. Annette). Heavy white petals and sepals with large fringed lip having a tiny splash of purple on tip.
- R-712 LC. H. G. ALEXANDER, F.C.C. x C. MOSSIAE, dark variety 1.50
- Lc. H. G. Alexander = Lc. Meloch x Lc. Momus
- The F. C. C. variety is an October flowering plant with three blooms on a spike. The C. Mossiae parent has heavy dark sepals and petals, large lip and a spread of 8½". This cross is expected to flower in the winter months. Fine.
- R-720 BLC. MORNING SUN x BLC. GOWAN 1.50
- The Blc. Morning Sun parent is Blc. The Baroness x C. Enid, alba. Characteristics of this parent are these: free winter flowering, leathery texture, huge lip, yellow color and great vigor. Blc. Gowan, (Blc. The Baroness x Lc. Penshurst) is of heavy texture and yellow in color. The season of this cross is expected to extend from fall through winter.
- R-728 C. MONMOS x BC. WARNHAM BEAUTY, A. M., R. H. S. 1.25
- The C. Monmos parent (C. Mossiae x C. Monarch) has a four year record of good and very good blooms in March. Bc. Warnham Beauty, A.M., R.H.S., (Bc. Digbyano-Mossiae x C. Tityus) is winter flowering, having large sized heavy textured blooms. Lip is bright rose with ruffled edge. These seedlings were grown for flower production in February and March.
- R-731 C. MONMOS x LC. NELSON 1.00
- C. Monmos has lovely shaped lavender petals, rose lip and yellow eyes. Lc. Nelson (Lc. Windermere x C. Syros) has petals 3" wide. The very large bright rose lip is outlined with a tiny lavender border. Flowers in December. Very good blooms during the winter months are expected from this.

R-733 C. MOSSIAE WAGNERI x C. TRIANAE, Broomhill's variety 1.25

The C. Mossiae Wagneri is beautifully shaped because of its rounded petals. The lip is white with yellow center and the petals are pure white. It flowers in May.

C. Trianae, Broomhill's var. is the parent of many fine pure white hybrids. It flowers in January or February.

This cross C. Trimos, alba has shown itself a vigorous grower. The pure white flowers should be most profuse in March and April.

R-738 C. ELEANORE, alba x C. HAROLD, alba 1.50

A lovely white with colored lip that will bloom in the late spring.

C. Eleanore (C. Hardyana x C. gigas, F.M.B.) is a large flower with heavy pure white petals and sepals and a lovely rose lip with yellow eyes.

C. Harold (C. gigas x C. Gaskelliana) Large flowers of fine shape and good substance. Petals and sepals are pure white. The lip is long and graceful with a deep rose tip and fringed with white. The throat has a bright yellow center.

R-739 C. LORANORE x C. HAROLD, alba 1.50

A spring blooming white with colored lip.

C. Loranore (C. Eleanore, alba x C. Lorna) A good growing plant producing lovely large flowers of good form and texture. The petals are pure white. The rose lip is long and graceful with a bright yellow center.

C. Harold (Same as parent of R-738.)
